Usage of any items from the University of Cumbria's institutional repository 'Insight' must conform to the following fair usage guidelines.

Any item and its associated metadata held in the University of Cumbria's institutional repository Insight (unless stated otherwise on the metadata record) may be copied, displayed or performed, and stored in line with the JISC fair dealing guidelines (available [here](#)) for educational and not-for-profit activities

provided that

- the authors, title and full bibliographic details of the item are cited clearly when any part of the work is referred to verbally or in the written form
- a hyperlink/URL to the original Insight record of that item is included in any citations of the work
- the content is not changed in any way
- all files required for usage of the item are kept together with the main item file.

You may not

- sell any part of an item
- refer to any part of an item without citation
- amend any item or contextualise it in a way that will impugn the creator's reputation
- remove or alter the copyright statement on an item.

The full policy can be found [here](#).

(Current Biology 27, 1825–1828; June 19, 2017)

Due to a tabular error, the means and standard deviations originally reported in this article were incorrect. The means, standard deviations, Figure 2, and the resulting analyses have been corrected in the article online. The statistical effects reported in the article remain the same in terms of direction of effect and have increased statistical significance. The other data reported in the article, namely the difference t test and the inter-rater reliability, are unaffected. The authors apologize for the error.
